BİLİM TÜRKİYE

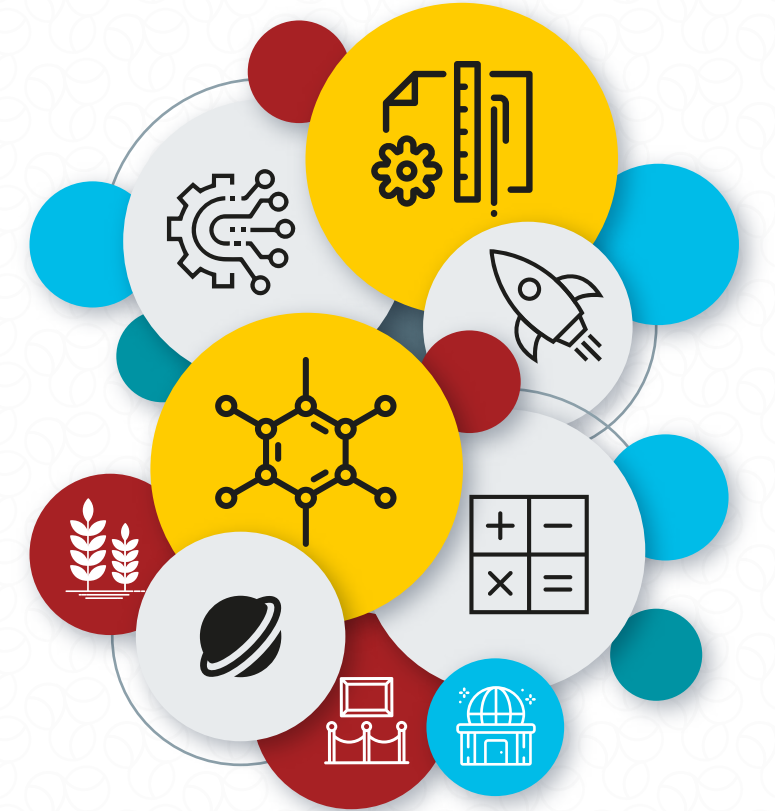

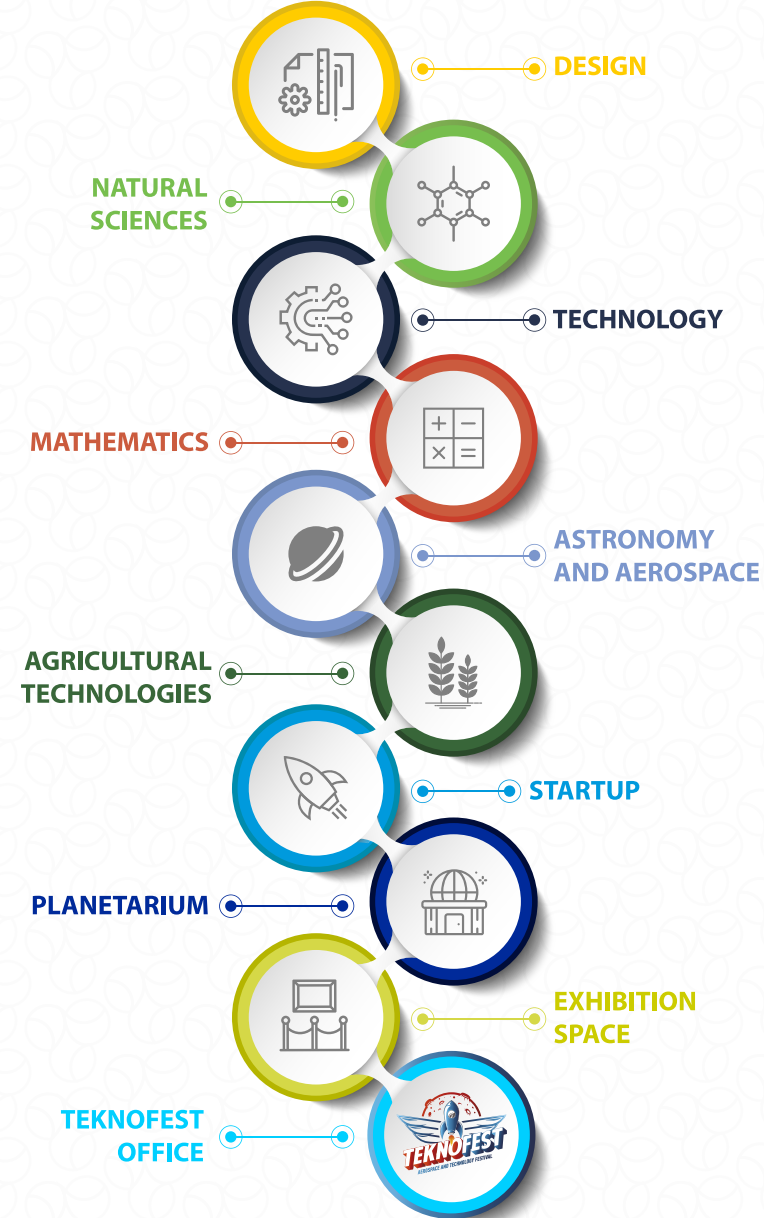

Bilim Türkiye aims to facilitate science communication by bringing science and technology to wide audiences, to increase interest in science and technology in society, and to cultivate a curious, questioning, and productive generation.

Through hands-on workshop training, experimental setups, and a planetarium offered at science centers, participants are enabled to discover and internalize related concepts through experience, as well as to concretize abstract concepts. In addition, science talks, seminars and conferences are organised to introduce different branches. Awareness of science and technology is created through many activities such as science festivals.

Bilim Türkiye offers hands-on workshop training in 7 different themes to students aged 6-14.

NATURAL SCIENCES
ASTRONOMY, AVIATION
AND SPACE DESIGN
MATHEMATICS
STARTUP
TECHNOLOGY
AGRICULTURAL
TECHNOLOGIES

WHAT DO WE HAVE IN OUR CENTERS?

FACE TO FACE TRAININGS

In workshops with 7 different themes that placed in Bilim Türkiye Centers; face to face trainings in the field of science, technology and art are given to the students at 6-14 age group.

All of the trainings are given practically in specially conceived workshops based on "Learning by Doing and Experiencing" model.

ONLINE TRAININGS

In addition to Face to Face Trainings, Bilim Türkiye offers Online Trainings and reaches every child.

Online Trainings are carried out through the distance education platform developed by the T3 Foundation in order to follow the development of our students in the process and to monitor teacher-student communication in the best way. Digital education tools such as simulations, animations, videos or instant surveys are used in the lessons and an interactive education approach is adopted.

EVENTS

Interviews

It is aimed to increase the interest in the fields of science, technology and art in the society by providing science communication with interviews realized in these fields for students and teachers of all ages.

Tours & Observation Activities

In Bilim Türkiye, tours and observation activities are organized for children to connect with nature, realize the balance of nature, develop their curiosity and sensitivity towards nature and increase their interest in research and examination.

SCIENCE BRIDGE PROGRAMS

Bilim Türkiye, aiming to deliver science education across Türkiye, brings science to children who are unable to access science centers within the scope of the Science Truck and Rural Schools projects.

The planetarium, which is a complementary element of Bilim Türkiye trainings, allows participants to concretize abstract concepts and offers a unique experience.

EXHIBITIONS AREA

A World of Discovery Exhibition Area in Bilim Türkiye science centers consists of experimental setups that appeal to both children and adults. Visitors have the opportunity to observe and explore various theoretically known scientific concepts by experiencing the experimental setups on their own.
